SEG2105 - Introduction to Software Engineering

Fall 2026 Project

Marking Scheme for Deliverable 2 (3%)

Due (new date) : November 1st by 11h59pm.

Implement the Administrator workflow. StudyHub has one predefined Administrator who maintains the course-category catalogue and manages eligible user accounts.

What to submit via Brightspace:

Note that all of your source code must be in your GitHub repository.

Use the following content for your `.gitignore` file that helps exclude commonly ignored files: https://github.com/github/gitignore/blob/main/Android.gitignore

A zip file that will include the following:

1. A readme file with the link for your repository and the list of all members.
2. An APK of your app (with the functionality described in deliverable 1). APK generated (debug one). APK can be found in
   `<project_root>/app/build/outputs/apk/debug/.`
   `For more info: https://developer.android.com/studio/run/`
   Name the APK after the name of your team "group1_debug_apk".
3. A PDF document that contains an UML Class diagram of your domain model. This will only include the UML classes related to deliverable 1.

Note:

I need to be able to login using the credentials:

- username: admin
- password XPI76SZUqyCjVxgnUjm0

Feature or Task	% Weight (out of 100)
Updated UML Class Diagram of the Domain Model: • **-2** for each missing class • **-2** for incorrect generalization • **-0.5** for each incorrect multiplicity • **-0.5** for each missing attribute	10%
APK submitted and ALL features working	5%
Adding categories - Admin should have the ability to add categories. A category has a name and description.	15%
Editing categories - Admin should have the ability to edit categories.	15%
Deleting categories - Admin should have the ability to delete categories.	15%

Feature or Task	% Weight (out of 100)
List all user accounts - Admin should be able to see all users registered in the app	15%
Admin should be able to delete or disable an user account (student or group leader)	15%
Field Validation – User input is validated in all relevant screens (e.g., valid email, names, etc.). • **-1** for each non-validated field	10%
